 ■ Special Schools

Key Statistics

The health of people in North West Leicestershire is generally similar to the England average. About 12% (2,100) of children live in low income families.

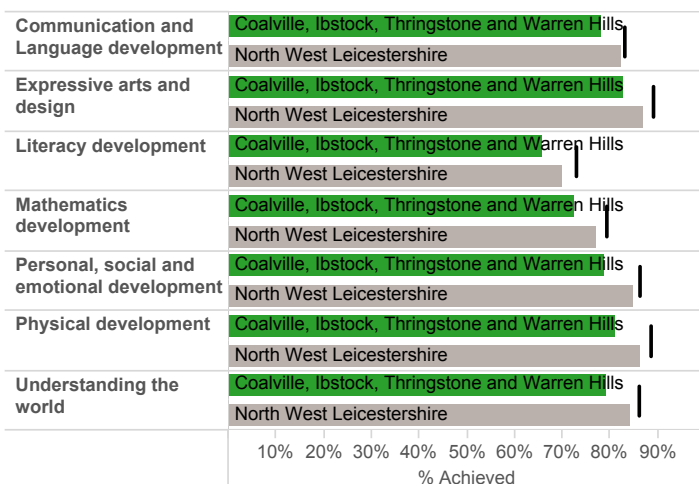

- Deprivation is lower than average in North West Leicestershire and
- * life expectancy for both men and women is similar to the England average.
- * The cluster has 14 primary and 5 secondary schools. 6185 pupils attend these schools and 52.5% are male.
- * The modelled percentage of pupils at age 5 achieving a good level of development in the cluster is worse than the England average.
- * In Reception, 337 children were classified as overweight or obese. In Year 6, this rises to 523 children (2013/14 - 15/16 collective).

Key Figures

	Coalville, Ibstock, Thringstone and Warren Hills	North West Leicestershire
Black Minority Ethnic Pupils (BME)	9.5%	8.8%
English as an Additional Language (EAL)	4.8%	4.1%
Free School Meals (Eligible)	10.8%	8.6%
Special Educational Needs (SEN) Statement	5.2%	2.8%
Special Educational Needs (SEN) Support	14.1%	12.0%

School Readiness

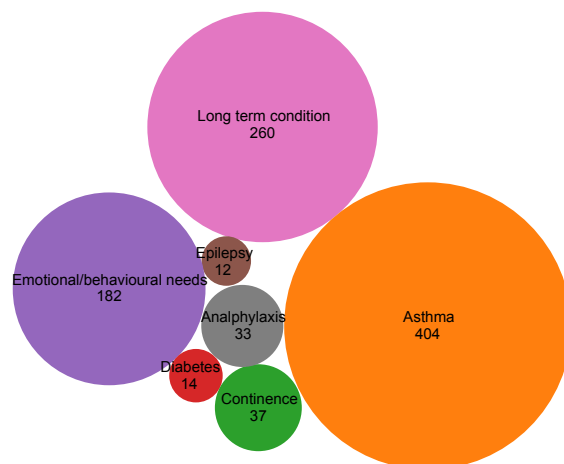

School readiness is a measure of how prepared a child is to succeed in school, cognitively, socially and emotionally. Just as there is an achievement gap in school performance, there is a school readiness gap that separates disadvantaged children from their more affluent peers.

Leicestershire percentage

School Health Profile

The school health profile will support schools to establish a clear and concise picture of health issues within the school and the wider community for children of all ages. The circles show the counts of pupils with medical conditions in the school cluster. The sizes of the circles are proportional to number of pupils with each condition. 95% of schools completed the return. Values of less than five are suppressed.

Child Health Summary for Coalville, Ibstock, Thringstone and Warren Hills

The chart below shows how the health of children in this area compares with the rest of England. This area's result for each indicator is shown as a circle. The average for England is shown by the black line, which is always at the centre of the chart. The range of results for all local areas in England is shown as a grey bar. A red circle means that this area is significantly worse than England for that indicator; however, a green circle may still indicate an important public health problem.

- Significantly worse than England average
- Not significantly different from England average
- Significantly better than England average
- Not compared

Indicator Name	Local Value	Eng Avg	Eng Worst	England Range	Eng Best
