Key Statistics for Coalville Cluster

- The health of people in **North West Leicestershire** is varied compared with the England average. Deprivation is lower than average and life expectancy for both men and women is similar to the England average.
- The Coalville cluster contains 20 schools, 14 primary schools 5 secondary schools and 1 special school. 6,226 pupils attend these schools and 51% are male.
- The modelled proportion of children living in poverty is better than the England average.
- The modelled percentage of pupils at age 5 achieving a good level of development in the cluster is worse than the England average.
- The modelled percentages of children with excess weight in Reception and Year 6 are similar to the England average.

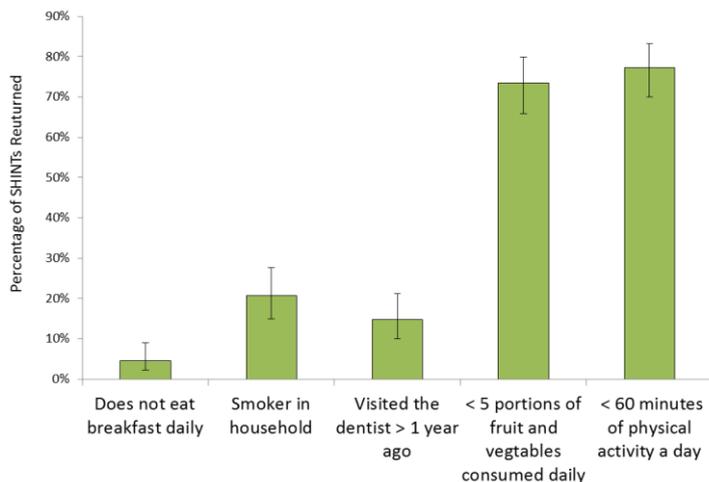

Key Figures

Indicator	Cluster Value	District Value
% BME	7.4%	7.5%
% Pupils eligible for free school meals	12.3%	10.1%
% Pupils where English is not their first language	3.5%	3.6%
% Pupils with statements or EHC plans	4.8%	2.8%
% Pupils with SEN support	15.4%	12.3%

Child Health Survey Responses

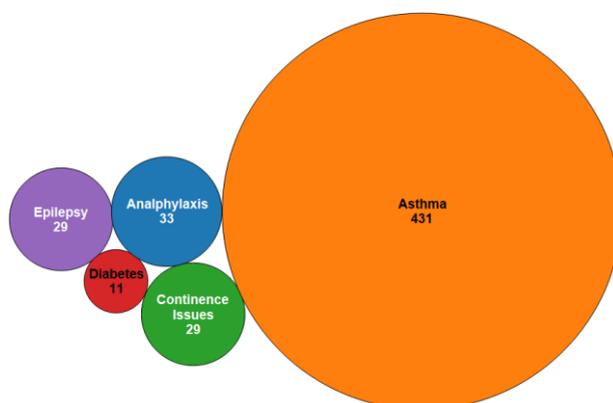

SHINT

The chart below shows the percentage of the school population at Reception age (who completed the SHINT questionnaire) that perform certain health behaviours.

School Health Profile

The circles show the counts of pupils with medical conditions in the school cluster. The sizes of the circles are proportional to number of pupils with each condition.

N.B. Does not include all schools in the cluster

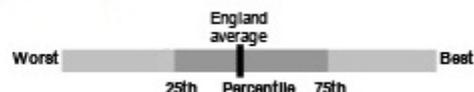

Child Health Summary

The chart below shows how the health of children in this area compares with the rest of England. This area's result for each indicator is shown as a circle. The average for England is shown by the black line, which is always at the centre of the chart. The range of results for all local areas in England is shown as a grey bar. A red circle means that this area is significantly worse than England for that indicator; however, a green circle may still indicate an important public health problem.

Key:

- Significantly better than England average
- Not significantly different from England average
- Significantly worse than England average

England Key:

Indicator	Local Value	Eng Avg	Eng Worst	England Range	Eng Best
1 Low Birth Weight Births (%)	6.7	7.4	13.8		1.4
2 Child Poverty (%)	15.9	21.8	79.8		1.0
3 Child Development at age 5 (%)	56.1	63.5	19.1		95.0
4 GCSE Achievement (5A*-C inc. Eng & Maths) (%)	51.7	58.8	21.0		100.0
5 Children with excess weight (Reception Year) (%)	23.6	22.5	45.5		6.0
6 Children with excess weight (Year 6) (%)	32.1	33.5	54.1		10.0
7 Emergency admissions in under 5s	103.5	150.0	400.4		28.4
8 A&E attendances in under 5s	265.9	509.5	2302.5		104.6
9 Deliveries to teenage mothers (%)	2.0	1.5	7.9		0.0
10 Children's and young people's admissions for injury	1081.0	1180.9	2647.8		412.7

Indicator Notes

1. % of all live births at term weighing less than 2,500 grams, 2008-12 2. % of children in low income families (children living in families in receipt of out of work benefits or tax credits where their reported income is < 60% median income) for u-16s only, 2010 3. % of pupils achieving a good level of development at age 5, 2011/12 4. % of pupils achieving 5 GCSEs grades A* - C, including English and Maths, 2011/12 5. % of measured children in Reception Year who were classified as overweight or obese, 2010/11 – 2012/13 6. % of measured children in Year 6 who were classified as overweight or obese, 2010/11 – 2012/13 7. Crude rate of emergency hospital admissions for children (aged under 5 years), per 1,000 resident population, 2010/11 – 2012/13 8. Crude rate of A&E attendance rate per 1,000 population aged 0-4 years, 2010/11 – 2012/13 9. % of deliveries where mother is aged under 18 years, 2008/09 – 2012/13 10. Hospital admissions caused by unintentional and deliberate injuries to children and young people (aged 0-17 years), 2008/09 – 2012/13
