## Key Statistics

- The health and wellbeing of people in Leicestershire is generally better than the England average. The level of child poverty is better than the England average and children have better than average levels of obesity. The percentage of five year olds with one or more decayed, filled or missing teeth is worse than the England average. A lower than average proportion of children are judged to have achieved a good level of development at the end of foundation stage, with 58% achieving this milestone. This assessment is completed in the final term of the academic year in which a child reaches the age of five.
- The health of people in Hinckley and Bosworth is generally better than the England average. Deprivation is lower than average and life expectancy for both men and women is higher than the England average.
- Although the proportion of children living in poverty is better than the England average, almost 2,200 children still live under this circumstance.
- Hinckley and Bosworth has 33 primary and 13 secondary schools. It also has one special school. 16,716 pupils attend these schools and 52% are male.
- Rates of breastfeeding at 6-8 weeks was significantly worse than the national average in 2013/14.
- In Reception, over 240 children were classified as overweight or obese in 2013/14. In Year 6, this rises to over 300 children, almost 30% of all children in this year group.
- Levels of teenage pregnancy is similar to the England average, however 41 teenagers became pregnant in 2013.

# School Demographics

## Child Residence

This map shows the child's residence of those attending schools in this area. The orange coloured areas have the most children attending these schools.

## Age Profile

This chart shows the age profile of pupils attending schools in this area, compared to age profile of all school children in Leicestershire.

## Income Deprivation Affecting Children Index

The index measures the proportion of children under the age of 16 that live in low income households. This chart shows of those children that attend a school in this district, the percentage that live in each national quintile compared to the Leicestershire average.

## Mode of Transportation to School

Physically active children are healthier, happier and more socially connected than children who have more sedentary lifestyles. 'Incidental' exercise, including active transport, can substantially contribute to overall levels of physical activity.

## Key Figures

Area	% BME	% Pupils eligible for free school meals	% Pupils where English is not their first language	% Pupils with statements or EHC plans	% Pupils with SEN support
Hinckley & Bosworth	9.7%	7.8%	3.4%	3.2%	11.9%
Leicestershire	16.2%	8.4%	7.5%	2.6%	10.6%

# Educational Achievement

## GCSE Achieved (5a\*-c inc. Eng & Maths)

This map shows the percentage of pupils achieving 5 or more GCSEs at grades A\*-C (including English and Maths) who live in this area based on national quintiles. The darkest colour areas are the highest achieving.

## Achievement Throughout School Journey

This chart highlights educational achievement throughout school years, based on district of residence, compared to national results.

**Early years:** % of pupils achieving a good level of development  
**Year 6:** % of pupils achieving the expected level in English and Maths  
**GCSE:** % of pupils achieving 5 or more A\*-C grades at GCSE or equivalent including English and Mathematics GCSEs.

# Health Improvement

## Trend 1:

Reception Children: Percentage Overweight (including Obese)

## Trend 2:

Year 6 Children: Percentage Overweight (including Obese)

## Teenage Pregnancy (Under 18)

Research evidence, particularly from longitudinal studies, shows that teenage pregnancy is associated with poorer outcomes for both young parents and their children.

## Trend 3:

Under 18 Conceptions: Rate per 1,000 aged 15-17 females

This map shows any significant difference in teenage pregnancy rates in this area compared to England.

# Child Health Summary for Hinckley and Bosworth

The chart below shows how the health of children in this area compares with the rest of England. This area's result for each indicator is shown as a circle. The average for England is shown by the black line, which is always at the centre of the chart. The range of results for all local areas in England is shown as a grey bar. A red circle means that this area is significantly worse than England for that indicator; however, a green circle may still indicate an important public health problem.

## Key:

- Significantly better than England average
- Not significantly different from England average
- Significantly worse than England average

## England Key:

	Indicator	Local Number	Local Value	Eng Avg	Eng Worst	England Range	Eng Best
Wider determinants	1 Children in poverty (under 16s)	2,150	11.8	19.2	37.9		5.8
