% Pupils registered as SEN without a statement	11.8%	12.0%

Child Health Survey Responses

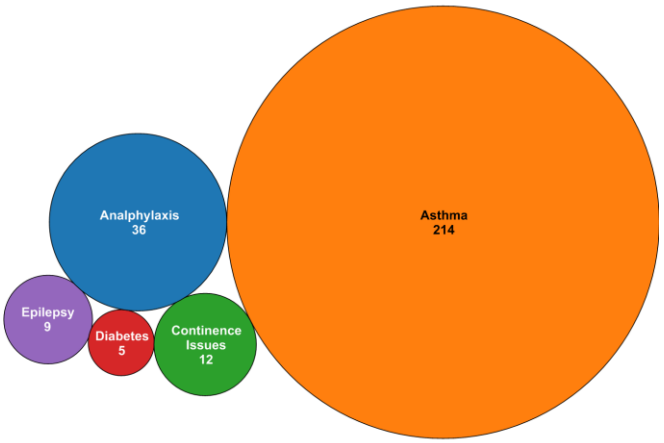
SHINT

The chart below shows the percentage of the school population at Reception age (who completed the SHINT questionnaire) that have a health concern in the following areas. The numbers present in the bars are the counts of pupils

No data available

School Health Profile

The circles show the counts of pupils with medical conditions in the school cluster. The sizes of the circles are proportional to number of pupils with each condition.



Child Health Summary

The chart below shows how the health of children in this area compares with the rest of England. This area's result for each indicator is shown as a circle. The average for England is shown by the black line, which is always at the centre of the chart. The range of results for all local areas in England is shown as a grey bar. A red circle means that this area is significantly worse than England for that indicator; however, a green circle may still indicate an important public health problem.

Key:

- Signficantly better than England average
- Not significantly different from England average
- Signifcantly worse than England average

England Key:

	Indicator	Local Value	Eng Avg	Eng Worst	England Range	Eng Best
