Official estimates of unemployment in the UK are obtained from the Labour Force Survey (LFS) using the internationally agreed International Labour Organisation (ILO) definition. The ILO definition is based on the number of people without jobs who are looking for work. The LFS unemployment figures which are subject to sampling differences are only available for Local Authority (LA) areas and are released on a quarterly basis. The Claimant Count is released on a monthly basis and is available down to ward level, so is used as a more current indicator of unemployment levels.

**Table 5: ILO Unemployment Rates**

Area	ILO Unemployment Rate	Total Persons ILO Unemployed	Claimant Count Totals (March 2006)
Great Britain (Feb 06)	5.2%	1,529,000	960,487

# Leicester Shire Business Survey Winter 2005/06

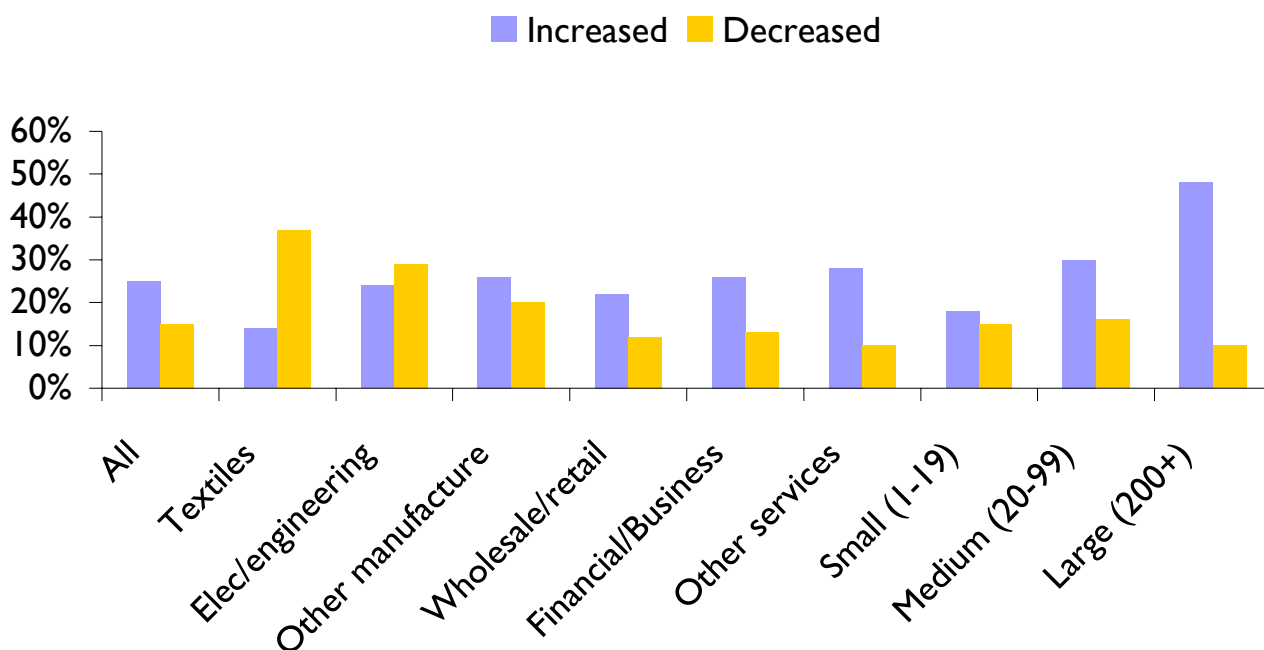

The Leicester Shire Business Survey Winter 2005/06 has identified several key workforce trends within the Leicester and Leicestershire sub region. The survey, which is one of the most authoritative available, is produced by Leicester Shire Intelligence and reflects the views of over 750 local businesses. The following analysis is an extract from the Winter 2005/06 survey, to view the Business Survey in full please visit [www.lshint.info](http://www.lshint.info) where the latest document and previous editions are available to download.

## Workforce Growth

Growth in the workforce has remained fairly static. 60% of firms reported no change in their workforce over the past six months, much the same as in the Summer 2005 Survey. 25% said that their workforce had increased and 15% that it had decreased. Slightly more manufacturers (27%) said their workforce had decreased compared with 23% who said it had increased.

Smaller companies were less likely to have increased in size, (18% of those with less than 20 staff compared with 30% of those with 20-199 staff and 48% of those with 200+ employees).

Figure 1: Workforce change over the past six months

## Staff Turnover

The companies surveyed had recruited for a total of just over 3,900 jobs, but almost 3,700 of these were to fill vacancies where people had left the organisations, resulting in a net increase of about 200 in the past six months. Manufacturers had a net loss of about 270 employees, whereas the service sector had grown by about 500 employees. However, some of the employment growth was temporary Christmas staff in the retail sector.

Table 1: Actual Changes in workforce by sector

	All	Tex- tiles	Elec- Engin- eering	Other manu- factur- ing	Whole- sale, retail	Financial / business services	Other ser- vices	Small (1-19)	Medium (20-199)	Large (200+)
Increase	3,928	78	201	362	1,220	469	1,598	385	2,104	1,439
Decrease	3,690	261	290	361	884	434	1,460	480	2281	929
Net change	238	-183	-89	1	336	35	138	-95	-177	510

The main reasons given for staff leaving were: to take another job with better pay or conditions (47%), to take another job which was a promotion (22%), retirement (18%) or personal reasons (17%). A total of 10% had made staff redundant and 13% said staff had been dismissed for disciplinary reasons or because they did not make the grade. (Percentages based on those organisations that had one or more members of staff leave in the previous 6 months)

## Outlook

The outlook for the next 6 months is still fairly optimistic. Just over a quarter of firms surveyed (25%) expect the size of their workforce to increase during this time. Only 8% expect their workforce to decrease and 64% expect it to stay the same.
